

NANO TECH 6800

ADVANCED CHEMICAL SOLUTIONS PRESENTS:

By incorporating nano technology, we have created a true Micro emulsion Semi synthetic coolant, containing nanotech lubricity agents that work at the microscopic level. The nano structure in our coolant reacts under the pressure of cutting directly at the tool/workpiece interface, this helps to reduce cutting forces, which results in better surface finishes and increased heat dissipation.

These characteristics enable the Nano Tech 6800 coolant to increase tool life and help reduce the effects of virtually every root cause of tool failure, including built-up edge, flank wear, chipping, crater wear and plastic deformation.

ADVANTAGES:

- Chlorinated
- Hard Water Stable
- No Formaldehyde
- No Sulfur
- No Heavy Metals
- Rejects Tramp Oil

Call: 330-283-3965
330-283-5157

MACHINING ADVANTAGES:

- Exceptional Lubricity
- Low Foam
- Reduced Built up Edge/
Improved Tool Life
- Extended Sump life
- Improved Finish
- Runs Cleaner
