

# PROTECT IT 165 S

## ADVANCED CHEMICAL SOLUTIONS PRESENTS:

**P**rotect IT 165 S is a solvent based, water displacing corrosion prevention product. Our product is formulated to provide a thin preventive film on parts to be stored inside from a short term of 6 - 12 months depending on dilution and conditions such as temperature and humidity. Parts must be clean and free of chips or swarf prior to treatment. These conditions will affect the lifespan of any rust inhibitor. Protect IT 165 can be immersed, sprayed, wiped or brushed on. This product is not intended for outdoor protection. Formulated for all metals. Additional rust preventives available based on application.

### ADVANTAGES:

- Multi metals
- Superior water displacement
- Non-staining
- Wets completely
- Thin film non-discernible coating
- Low odor
